

ONLINE EXAMINATION SYSTEM

The project entitled as “**ONLINE EXAMINATION SYSTEM**” is a web-based application developed for conducting secure, timer based online examinations with automated scoring, performance evaluation, and intelligent ranking mechanisms. The system is designed to support two main modules: Admin and Student.

The admin module allows administrators to create and schedule exams, manage question banks with difficulty levels (Easy, Medium, Hard), monitor student performance, generate suggestions, and analyse overall system analytics.

The student module enables students to log in, view sample questions, attempt scheduled exams within a specified time limit, receive automatic scoring, practice sample questions and view detailed performance dashboards including ranking levels such as High, Medium, and Low.

The system provides real time evaluation and performance tracking. It improves efficiency, reduces manual evaluation errors, and enhances transparency in examination systems.

Technologies used:

Python, HTML, CSS, Bootstrap, JavaScript, Angular, Django, SQLite/PostgreSQL

Requirements

Hardware:

1. Processor: 2.0 GHz Pentium or above
2. RAM: Minimum 4GB
3. Hard Disk: 20GB Free Space
4. Internet Connection

Software:

1. Python 3.x
2. Django Framework
3. Django REST Framework
4. Angular (Latest Version)
5. VS Code
6. SQLite / PostgreSQL
7. Web Browser (Chrome / Edge / Firefox)

Modules

1. Admin

- a. Admin Login
- b. Add / Manage Exams
- c. Add Question Papers
- d. Add Questions with Difficulty Levels
- e. Schedule Exams
- f. View Student Results
- g. Generate Performance Suggestions
- h. View Analytics Dashboard
- i. Manage Users

2. Student

- a. Student Registration & Login
- b. View Sample Questions
- c. Question Bank
- d. Timer-Based Exams
- e. Automatic Scoring
- f. View Result Dashboard
- g. Performance Analytics
- h. Ranking (High / Medium / Low Level)
